Education

University of Wisconsin-Madison (USA)

Sep. 2019 - May 2024

- **B.S. Mechanical Engineering**, International Engineering Certificate
- Coursework: Programming, Sustainable Energy Systems, System Dynamics, International Business
- GPA: 3.64/4.0; Dean's Honor List

Work Experience

NASA Innovative Advanced Concepts (UW-Madison), **Undergraduate Researcher**

Aug. 2022 - Apr. 2024

- Led cross-functional team of four in researching and developing shield structure by managing timelines, documenting specifications and coordinating client communication.
- Performed engineering calculations and simulation-based analysis with MATLAB and Python.
- Presented weekly technical reports, successful milestone results and funding proposals.

Audi AG (Ingolstadt, Bavaria), **Press Maintenance Engineer Intern**

June - Sep. 2023

- Digitalized the condition monitoring platform to support global press factory operations with visual programming and JavaScript, enhancing accessibility, data integration and user experience.
- Performed local and regional site-visits to resolve maintenance alerts on 10+ metal forming presses, collaborating with diverse teams and ensuring accurate solution implementation.
- Created technical documentation, floor plans, product portfolios and cost analyses in German.

Engineering Industries, Inc. (Madison, Wisconsin), **Project Engineer Co-op**

May 2021 - Feb. 2022

- Designed and implemented 30 custom assemblies for injection molding presses, production parts, factory robots and operational solutions, using CAD, 3D printing and machining.
- Assembled shop drawings for fabrication, production floor maps and manufacturing schedules.
- Maintained database of thousands of part numbers, quotes, orders and project files.

Other Experience & Projects

Energy Systems Laboratory (ME 370), **Experiments & Reports**

Jan. - Apr. 2024

- Designed, modeled and analyzed efficiency of HVAC systems with MATLAB and Python.

Graduate Renewable Energy Systems (ME 472), **Capstone Project**

Oct. - Dec. 2023

- Performed techno-economic and LCOE analysis of emerging Airborne Wind Energy system.

Hamburg University of Applied Sciences (Hamburg, Germany), **Exchange Student**

Mar. - July 2022

- Led international team of five in designing novel gadget during Product Development course.

Skills & Interests

Skills: CAD, CAE, German, MATLAB, Python, Renewable Energy, Technical Writing

Ask me about: Cooking, Cycling, Music, Skiing, Tennis, Yoga
